JONATHAN PEÑA

FULL STACK DEVELOPER

PROFESSIONAL SUMMARY

Software developer with extensive experience in web design, bug fixing, and full-cycle project development. Skilled in creating responsive and user-friendly interfaces, maintaining existing systems, and building new features from scratch. Knowledgeable in a wide range of platforms, programming languages, and web technologies, with strong problem-solving skills and a focus on performance and usability. I am confident managing solo projects from planning to deployment and thrive when collaborating within agile, cross-functional teams to deliver high-quality solutions.

EXPERIENCE

Full-Stack Developer – Freelancer

February 2025 - Present

- Designed and developed new features and functionalities for client websites and small business platforms.
- Identified and resolved cross-browser compatibility issues across various devices and screen sizes.
- Optimized website performance by reducing load times and improving code efficiency through clean HTML, CSS, and JavaScript practices.
- Collaborated closely with designers and backend developers to deliver visually engaging and responsive user experiences.
- Provided maintenance and regular updates to ensure websites remained secure, functional, and up-to-date with client needs.

Entry-Level Front-End Developer – DOOR3

November 2024 - February 2025

- Collaborated with designers and senior developers to build responsive UIs using React.js, JavaScript, and Tailwind CSS.
- Implemented reusable components from Figma wireframes while ensuring accessibility and visual consistency.
- Integrated RESTful APIs for dynamic content, with proper error handling and loading states.
- Participated in Agile workflows, daily standups, and code reviews to support team goals and improve technical skills.
- Debugged front-end issues and contributed to small feature enhancements across enterprise-level applications.

Cementos Cibao S.A. - Front-End Developer

January 2020 - February 2022 *Santiago, Dominican Republic*

- Designed and developed new features and functionality for existing systems.
- Identified and resolved browser compatibility issues across different devices and browsers.
- Optimized website performance by reducing page load time and improving efficiency of AJAX requests.
- Analyzed user needs to determine technical requirements.
- Collaborated closely with the back-end developers to integrate API calls into the front-end codebase.

EDUCATION

January 2014 - December 2019 - 7th Semester

UTESA - Santiago, Dominican Republic

Software Engineer

June 2021 - March 2025

UDEMY

Certification
